### Summary

Hi! I like to code. I'm a creative with an engineering mindset. In my previous career, as a fashion designer-constructionist-pattern maker, I engaged with clients who had unique physical differences. Empathizing with their concerns forced me to create and form practical solutions that fulfilled their emotional needs via tailored design and development of garments/ products formatted for them.

Now, I want to share my skill set to create websites for clients and give them the exact emotional response to shine on the world wide web. I would like to bridge that emotional gap between the electrical pulses of computational hardware to the soft-warm hearts of people.

### Programming Skills

- ◆ HTML5/CSS3/SCSS
- ◆ React.js/JavaScript/JQuery
- ◆ Adobe XD
- ◆ Vector Designs/ Illustrator
- ◆ Git/GitHub
- ◆ Terminal/Command Line
- ◆ AJAX/Node.js/APIs
